AI-Augmented Analyst – Session 1 Assignment

Meeting Transcript (Input)

Ops Lead: We're losing track of support tickets... SLA risk until it's too late. Support Lead: Need a single intake form with priority, category, requester details; auto-assign by category. Ops Lead: Weekly reporting: backlog by priority, avg time to first response, SLA breaches. Support Lead: Mus support attachments and audit history. Ops Lead: Start with top 5 categories in phase 1.

AI Summary

Summary: Team needs a centralized ticket intake system with priority, category, attachments, auto-assignment, audit history, and weekly SLA reports. Phase 1 limited to top 5 categories.

Requirements Candidates

Requirement Candidate	Type	Confidence	Status
Single intake form with priority/category/requester	Feature	High	New
Auto-assign tickets based on category	Feature	Medium	New
Weekly SLA & backlog reporting	Data/Reporting	High	New
Support attachments	Feature	High	New
Audit history of ticket changes	Rule/NFR	High	New

Decision: Phase 1 includes only top 5 categories.
Risk: SLA rules ambiguous – needs confirmation.
AI Use Log: AI used for summarization and requirement extraction; verified against transcript.
